

Silhouettes

Many birds make the mistake of flying into glass windows because they do not know the glass is there. Accidents like this can cause them to get knocked unconscious, break wings, legs or even their necks. By placing bird silhouettes on the windowpanes, you can help prevent wild birds from crashing into windows. Help your neighborhood birds by coloring the owl and putting him on a window. You can also find other bird silhouettes online and in books that will help discourage bird injuries!

Let Your Spirit Take Wing!
